Explain the role of cardiac muscles in a cat's body.

Describe how a cat's core muscles contribute to its overall movement and balance.

Which muscle group is primarily involved in a cat's ability to jump?

- Forelimbs muscles
- Core muscles
- Hindlimbs muscles
- Neck muscles

Which type of muscle is responsible for voluntary movements in cats?

- Smooth muscle
- Cardiac muscle
- Skeletal muscle
- Nervous tissue

What type of muscle is found in the walls of a cat's internal organs?

- Skeletal muscle
- Smooth muscle
- Cardiac muscle

- Striated muscle

Which muscles are part of the cat's forelimbs? (Select all that apply)

- Biceps brachii
 Triceps brachii
 Quadriceps femoris
 Extensors of the paws

Which of the following are functions of skeletal muscles in cats? (Select all that apply)

- Movement
 Digestion
 Posture
 Circulation

What is the role of the latissimus dorsi muscle in cats?

- Flex the hindlimbs
 Extend the forelimbs
 Support the spine
 Rotate the tail

Explain the differences between skeletal, smooth, and cardiac muscles in terms of structure and function.

What are common signs of muscle disorders in cats? (Select all that apply)

- Stiffness
 Increased energy
 Reluctances to move
 Weight gain

Which muscle type is unique to the heart?

- Skeletal muscle
- Smooth muscle
- Cardiac muscle
- Connectivetissue

Which muscle is located in the cat's back and assists with shoulder movement?

- Biceps brachii
- Trapezius
- Gastrocnemius
- Pectoralis major

What is a common symptom of muscle strain in cats?

- Increased appetite
- Limp
- Hyperactivity
- Excess grooming

Which nutrients are essential for maintaining healthy cat muscles? (Select all that apply)

- Protein
- Calcium
- Vitamin C
- Omega-3 fatty acids

Which muscle groups contribute to a cat's agility? (Select all that apply)

- Core muscles
- Neck muscles
- Hindlimbs muscles
- Tail muscles

What are some preventative measures to avoid muscle strain in cats?
