What is microbiology primarily concerned with?

- Study of plants
- Study of microorganisms
- Study of animals
- Study of minerals

What is the primary component of bacterial cell walls?

- Cellulose
- Chitin
- Peptidoglycan
- Lignin

What are the ethical considerations in the use of genetically modified microorganisms in research and industry?

How do vaccines work to protect against microbial diseases?

Explain the significance of the discovery of antibiotics in microbiology.

Which scientists contributed to the development of the germ theory of disease? (Select all that apply)

- Louis Pasteur
- Robert Koch
- Edward Jenner
- Joseph Lister

Which phase of microbial growth is characterized by rapid cell division?

- Lag phase
- Log phase
- Stationary phase
- Death phase

Which of the following microorganisms is responsible for causing malaria?

- Bacteria
- Virus
- Fungus
- Protozoan

Which factors can affect microbial growth? (Select all that apply)

- Temperature
- pH
- Oxygen levels
- Light intensity

Which of the following are considered eukaryotic microorganisms? (Select all that apply)

- Algae
- Bacteria
- Fungi
- Protozoa

What are the main differences between prokaryotic and eukaryotic cells?

Discuss the impact of Louis Pasteur's experiments on the field of microbiology.

Which of the following is a method of horizontal gene transfer in bacteria?

- Binary fission
- Mitosis
- Conjugation
- Meiosis

Which of the following are examples of viral diseases? (Select all that apply)

- Tuberculosis
- Influenza
- HIV/AIDS
- Malaria

Who is known as the father of microbiology for his work on germ theory?

- Alexander Fleming
- Louis Pasteur
- Robert Hooke
- Anton van Leeuwenhoek

Which of the following is a prokaryotic microorganism?

- Virus
- Fungus
- Bacterium
- Protozoan

Which of the following are components of a virus? (Select all that apply)

- Cell wall
- Nucleic acid
- Protein coat
- Ribosomes

What is the primary function of ribosomes in microbial cells?

- Energy production
- Protein synthesis
- DNA replication
- Cell division

Which of the following are methods used to control microbial growth? (Select all that apply)

- Sterilization
- Fermentation
- Disinfection
- Pasteurization

Describe the role of microorganisms in the nitrogen cycle.
