What is the primary focus of community ecology?

- A. Individual organisms
- C. Species interactions within a community ✓
- D. Ecosystem energy flow
- C. Population genetics

Which of the following are human impacts on community ecology? (Select all that apply)

- A. Climate change ✓
- C. Natural succession
- D. Pollution ✓
- C. Habitat destruction ✓

What type of succession occurs in an area where no soil previously existed?

- A. Secondary succession
- C. Primary succession ✓
- D. Climax succession
- C. Tertiary succession

Which of the following are characteristics of a climax community? (Select all that apply)

- A. High biodiversity ✓
- C. Stability ✓
- D. Low species richness
- C. Dynamic changes

Which species interaction involves one organism benefiting while the other is harmed?

Will be a selected and a selected an
Which species are considered apex predators? (Select all that apply)
A. Lions ✓
C. Sharks ✓
D. Rabbits
C. Deer
What are the components of a niche? (Select all that apply)
A. Habitat ✓
C. Interactions with other species ✓
D. Physical appearance
C. Resource use ✓
Which index is commonly used to measure species diversity?
A. Shannon index ✓C. Richter scale
D. Mohs scale
C. Beaufort scale
o. Boadion dodlo
What factors contribute to community stability? (Select all that apply)
A. High species diversity ✓
C. Frequent disturbances
D. Resource availability ✓
C. Presence of keystone species ✓
What is the term for the physical environment where a species lives?
A. Habitat ✓
C. Biome

A. MutualismC. Parasitism ✓D. CompetitionC. Commensalism

- D. Ecosystem
- C. Niche

Which term describes the number of different species present in a community?

- A. Species richness ✓
- C. Species diversity
- D. Species abundance
- C. Species evenness

What is the role of a keystone species in an ecosystem?

- A. They are the most abundant species.
- C. They have a large impact on their environment. ✓
- D. They are always top predators.
- C. They are the first to colonize new areas.

Which of the following is an example of a disturbance in an ecological community?

- A. Migration
- C. Fire ✓
- D. Pollination
- C. Photosynthesis

Which of the following are considered species interactions? (Select all that apply)

- A. Mutualism ✓
- C. Parasitism ✓
- D. Symbiosis
- C. Commensalism ✓
