**What is the primary focus of Computer Information Systems?**

- A. Theoretical computer science
- B. Intersection of technology, business, and people ✓**
- C. Pure mathematics
- D. Hardware engineering

**Which of the following are key topics in Computer Information Systems?**

- A. Systems Analysis and Design ✓**
- B. Organic Chemistry
- C. Database Management Systems ✓**
- D. Information Security ✓**

**Explain how the role of a Systems Analyst integrates both technical and business skills. Provide examples of tasks they might perform that require this integration.**

**A Systems Analyst bridges the gap between IT and business by understanding business needs and translating them into technical requirements. They might conduct requirement analysis, design system solutions, and ensure that IT systems align with business goals.**

**Which programming language is commonly used in Computer Information Systems?**

- A. Latin
- B. Java ✓**
- C. Ancient Greek
- D. Sanskrit

**Which skills are essential for a career in Computer Information Systems?**

- A. Proficiency in programming languages ✓**
- B. Knowledge of ancient history
- C. Understanding of database management ✓**
- D. Ability to perform complex surgeries

**Discuss the impact of emerging technologies like Artificial Intelligence and Machine Learning on the field of Computer Information Systems. How might these technologies change the role of a CIS professional?**

**AI and ML can automate routine tasks, enhance data analysis, and provide predictive insights, requiring CIS professionals to adapt by developing skills in these areas and focusing on strategic implementation.**

**Which of the following is a typical career path for a CIS graduate?**

- A. Marine Biologist
- B. Database Administrator ✓**
- C. Professional Athlete
- D. Chef

**What are some emerging areas in Computer Information Systems?**

- A. Cloud Computing ✓**
- B. Renaissance Art
- C. Big Data Analytics ✓**
- D. Internet of Things (IoT) ✓**

**Describe the role of cybersecurity in Computer Information Systems. Why is it critical, and what are some common practices used to ensure information security?**

**Cybersecurity protects data and systems from threats. It's critical to prevent data breaches and ensure privacy. Practices include encryption, firewalls, and access controls.**

**What is a primary benefit of using business intelligence tools in CIS?**

- A. Enhancing artistic creativity
- B. Improving decision-making processes ✓**
- C. Reducing physical exercise

D. Increasing sleep duration

**Which of the following are business and management skills important in CIS?**

- A. Project management techniques ✓**
- B. Communication skills ✓**
- C. Knowledge of ancient mythology
- D. Problem-solving skills ✓**

**How does project management contribute to the success of IT projects in the field of Computer Information Systems? Provide examples of tools and techniques used.**

**Project management ensures projects are completed on time and within budget. Tools like Gantt charts and Agile methodologies help manage resources and track progress.**

**Which skill is crucial for effectively communicating technical information to non-technical audiences?**

- A. Painting
- B. Communication skills ✓**
- C. Dancing
- D. Cooking

**Which of the following are trends impacting Computer Information Systems?**

- A. Blockchain Technology ✓**
- B. Ancient Egyptian Architecture
- C. Big Data Analytics ✓**
- D. Internet of Things (IoT) ✓**

**Analyze the role of database management systems in organizations. How do they support business operations and decision-making?**

**Database management systems store and organize data, enabling efficient retrieval and analysis, which supports informed decision-making and operational efficiency.**

**Which emerging technology is known for its decentralized ledger system?**

**A. Blockchain Technology ✓**

B. Traditional Banking

C. Typewriters

D. Paper Filing Systems

**Which of the following roles might a CIS graduate pursue?**

**A. Information Security Analyst ✓**

B. Fashion Designer

**C. Network Administrator ✓**

**D. Business Analyst ✓**

**Evaluate the importance of networking and telecommunications in the modern business environment. How do they facilitate business operations and connectivity?**

**Networking and telecommunications enable communication and data exchange, supporting remote work, collaboration, and access to information, which are vital for business operations.**

**What is the primary purpose of systems analysis and design in CIS?**

A. To create artistic designs

**B. To improve and develop information systems ✓**

C. To study ancient civilizations

D. To design fashion clothing

**Which of the following are technical skills required in CIS?**

**A. Understanding of networking protocols ✓**

B. Ability to write poetry

**C. Knowledge of cybersecurity principles ✓**

**D. Proficiency in programming languages ✓**

**Critically assess the role of business intelligence and analytics in strategic decision-making. How do these tools transform raw data into actionable insights?**
