**What is the primary goal of conservation strategies?**

- Economic development
- Genetic diversity conservation
- Urban expansion
- Industrial growth

**What is a major threat to biodiversity conservation?**

- Sustainable agriculture
- Habitat destruction
- Renewable energy
- Organic farming

**Which organization is known for its global conservation efforts?**

- NASA
- World Wildlife Fund (WWF)
- UNESCO
- World Health Organization (WHO)

**What is a common method used in habitat restoration?**

- Urbanization
- Reforestation
- Industrialization
- Deforestation

**Which international treaty aims to protect endangered species from trade?**

- Kyoto Protocol
- CITES

- Paris Agreement
- Montreal Protocol

**Explain the difference between in-situ and ex-situ conservation.**

**Which of the following is NOT a component of effective conservation strategies?**

- Habitat protection
- Community involvement
- Overfishing
- Legislation

**What are the goals of conservation strategies? (Select all that apply)**

- Restore degraded ecosystems
- Promote species extinction
- Conserve genetic diversity
- Increase pollution levels

**Which of the following are examples of ex-situ conservation? (Select all that apply)**

- National parks
- Zoos
- Botanical gardens
- Wildlife sanctuaries

**Why is community involvement crucial in the success of conservation strategies?**

**How can technology be leveraged to improve conservation strategies?**

**What role do international organizations play in conservation strategies?**

**Which of the following are examples of in-situ conservation? (Select all that apply)**

- biosphere reserves
- Seed banks
- Wildlife sanctuaries
- Aquariums

**Which technologies are used in conservation efforts? (Select all that apply)**

- Remote sensing
- Geographic Information Systems (GIS)
- Fossil fuel extraction
- Deforestation tools

**Which of the following is an example of in-situ conservation?**

- Seed banks
- Zoos
- National parks
- Botanical gardens

**What are some challenges faced by conservation strategies? (Select all that apply)**

- Climate change
- Habitat fragmentation
- Increased biodiversity
- Poaching

**What is the focus of ex-situ conservation?**

- Protect species in their natural habitats
- Preserving species outside their natural habitats
- Promoting urban development
- Enhancing agricultural productivity

**Discuss the impact of climate change on conservation efforts.**

**Describe a successful conservation project and its impact on biodiversity.**

**Which strategies are used to involve communities in conservation efforts? (Select all that apply)**

- Educational programs
- Habitat destruction
- Community-based resource management
- Urban development incentives
