Which organ stores urine before it is excreteted from the body?

- ◯ Ureter
- Bladder
- ◯ Kidneys
- ◯ Urethra

What is the primary function of the kidneys in the excretory system?

- O Produce hormones
- Filter blood
- Store urine
- Digest food

Which part of the nephron is responsible for filtering blood?

- Loop of Hen le
- ◯ Glomerulus
- O Distal tubule
- Collect ing duct

Which hormone increases water reabsorption in the kidneys?

- ◯ Insulin
- GI glucagon
- O Antidiuretic hormone (ADH)
- Adrenaline

Why is hydration important for the proper functioning of the excretory system?

Create hundreds of practice and test experiences based on the latest learning science. Visit <u>Studyblaze.io</u>

Excretory System Quiz PDF

Your AI Tutor for interactive quiz, worksheet and flashcard creation.

Which of the following can be symptoms of a urinary tract infection (UTI)? (Select all that apply)

- Frequent urination
- Burn ing sensation during urination
- Increased thirst
- Cloudy urine

Which substances are typically reabsorbed in the kidneys? (Select all that apply)

- Glucose
- 🗌 Urea
- U Water
- Sodium

What is the role of aldosterone in the excretory system?

- \bigcirc Decrease urine production
- Increase sodium reabsorption
- Increase glucose reabsorption
- Decrease blood pressure

Which organ is primarily responsible for removing carbon dioxide from the body?

- ◯ Liver
- ◯ Kidneys
- ◯ Lungs
- ⊖ Skin

What condition is characterized by the formation of solid crystals in the kidneys?

- Urinary tract infection
- Chronic kidney disease
- Kidneys stones

/

Your AI Tutor for interactive quiz, worksheet and flashcard creation.

○ Glomerulonephritis

Which processes occur in the renal tubules of the nephron? (Select all that apply)

Filtration

Reabsorption

Secretion

Excretion

Which of the following are functions of the excretory system? (Select all that apply)

Filtration of blood

Regulation of blood pressure

- Production of red blood cells
- Regulation of electrolyte balance

Explain how the kidneys contribute to maintaining acid-base balance in the body.

Describe the process of glomerular filtration and its importance in the excretory system.

What lifestyle changes can help prevent the formation of kidney stones?

Create hundreds of practice and test experiences based on the latest learning science. Visit <u>Studyblaze.io</u>

/

Your AI Tutor for interactive quiz, worksheet and flashcard creation.

Discuss the role of hormones in regulating kidney function and fluid balance.

How does chronic kidney disease affect the body's ability to maintain homeostasis?

Which organs are involved in the excretion of waste products? (Select all that apply)

- Kidneys
- Lungs
- Liver
- Heart

What are the roles of the nephron in the kidney? (Select all that apply)

- Filtration
- Reabsorption
- Secretion
- Digestion

Create hundreds of practice and test experiences based on the latest learning science. Visit <u>Studyblaze.io</u>

Excretory System Quiz PDF

Your AI Tutor for interactive quiz, worksheet and flashcard creation.

What is the primary waste product removed by the kidneys?

- \bigcirc Carbon dioxide
- ⊖ Urea
- Oxygen
- ⊖ Glucose
