Which element is a metalloid?

- Aluminum
- Silicon
- Sulfur
- Argon

What is the chemical symbol for Hydrogen?

- H
- He
- Hy
- Hg

Explain why elements in the same group of the periodic table have similar chemical properties.

Describe the significance of the atomic number for an element.

Why are noble gases considered inert, and how does this property affect their applications?

Which of the following elements are transition metals? (Select all that apply)

- Scandium
- Titanium
- Chlorine
- Iron

Which element is found in the second period and is a nonmetal?

- Lithium
- Beryllium
- Boro
- Nitrogen

Which element is known for being highly reactive with water?

- Iron
- Helium
- Sodium
- Carbon

Which element is a noble gas?

- Helium
- Hydrogen
- Lithium
- Oxygen

Which of the following elements are alkali metals? (Select all that apply)

- Lithium
- Sodium
- Potassium
- Calcium

Which elements are gases at room temperature? (Select all that apply)

- Hydrogen
- Helium
- Oxygen
- Magnesium

Which of the following elements are halogens? (Select all that apply)

- Fluorine
- Chlorine
- Argon
- Iodine

Which element has the atomic number 6?

- Nitrogen
- Oxygen
- Carbon
- Boron

Discuss the trend in reactivity observed in alkali metals as you move down the group.

What are some common uses of Silicon in modern technology?

Provide a brief explanation of how the periodic table is organized and the importance of this organization in chemistry.

Which element is commonly used in balloons due to its inertness?

- Hydrogen
- Helium
- Oxygen
- Nitrogen

What is the atomic number of Neon?

- 8
- 9
- 10

○ 11

Which elements are found in the second period of the periodic table? (Select all that apply)

- Lithium
- Beryllium
- Boro
- Calcium

Which elements are considered nonmetals? (Select all that apply)

- Oxygen
- Nitrogen
- Iron
- Carbon
