Which of the following is a primary cause of habitat loss?

- Increased rainfall
- Urbanization
- Animal migration
- Soil erosion

Which of the following is a consequence of habitat loss?

- Improved air quality
- Species extinction
- Increased agricultural yield
- More rainfall

What are some effects of habitat loss on ecosystems? (Select all that apply)

- Loss of biodiversity
- Ecosystem imbalance
- Increased species diversity
- Decreased ecosystem services

Which of the following are causes of habitat loss? (Select all that apply)

- Deforestation
- Urbanization
- Climate change
- Increased biodiversity

What is the main effect of deforestation on biodiversity?

- Increase in species variety
- Reduction in species variety

- Stabilization of ecosystems
- Increase in forest area

What is the role of protected areas in conservation?

- To increase urban development
- To protect biodiversity and ecosystems
- To promote deforestation
- To support industrial growth

How does habitat loss lead to species extinction? Provide an example.

What are ecosystem services, and how are they affected by habitat loss?

Which factors contribute to habitat loss through pollution? (Select all that apply)

- Air pollution
- Water contamination
- Soil degradation
- Noise pollution

Explain how agricultural expansion contributes to habitat loss.

Which of the following species are known to be affected by habitat loss? (Select all that apply)

- Orangutans
- Polar bears
- Domestic cats
- Certain bird species

Describe the impact of climate change on habitat loss and provide an example of a species affected.

Discuss the role of international organizations in addressing habitat loss.

What is habitat loss?

- Increase in biodiversity
- Process by which natural habitat becomes incapable of supporting its native species
- Expansion of urban areas
- Growth of forests

Propose a conservation strategy that could mitigate the effects of habitat loss and explain its potential impact.

Which organization is involved in global efforts to combat habitat loss?

- NASA
- World Wildlife Fund (WWF)
- FIFA
- International Monetary Fund (IMF)

Which species is most affected by the melting of polar ice caps due to habitat loss?

- Elephants
- Polar bears
- Tigers
- Kangaroos

What are some global implications of habitat loss? (Select all that apply)

- Increased global biodiversity
- Climate change acceleration
- Displacement of human communities
- Improved ecosystem services

Which human activity is least likely to cause habitat loss?

- Sustainable forestry
- Deforestation
- Urban sprawl
- Intensive agriculture

Which strategies are used in conservation efforts to combat habitat loss? (Select all that apply)

- Establishment of protected areas
- Industrial expansion
- Restoration projects
- Sustainable practices
