Which bone is the largest in a horse's body?

- Scapula
- Femur
- Humerus
- tibia

Which system includes the brain and spinal cord?

- Skeletal system
- Nervous system
- Circulatory system
- Digestivesystem

Explain the importance of the integumentary system in maintaining a horse's overall health and well-being.

What adaptations does the horse's respiratory system have to support high levels of physical activity?

Where does gas exchange occur in the horse's respiratory system?

- Trachea
- Alveoli
- Nasal cavity
- Bronchi

Which of the following are components of the horse's digestive system?

- Esophagus
- Cecum
- Pharynx
- Larynx

Describe the process of digestion in a horse, starting from ingestion to excretion.

Which of the following are part of the horse's respiratory system?

- Trachea
- Bronchi
- Lungs
- Stomach

Explain the function of the stay apparatus in horses.

Which bones are found in a horse's forelimbs?

- Radius
- Scapula
- Ulna
- Femur

How does the structure of a horse's hoof contribute to its overall locomotion and health?

Which part of the horse's hoof aids in blood circulation?

- Sole
- Wall
- White line
- Frog

What are the unique features of a horse's anatomy?

- Stay apparatus
- Single-chamber stomach
- Dual-chamber heart
- Ability to breathe through the mouth

Discuss the role of the nervous system in a horse's response to environmental stimuli.

What roles does the horse's skin play in the integumentary system?

- Sensory perception
- Temperature regulation
- Protection
- Nutrient absorption

What are the functions of the horse's circulatory system?

- Distribute nutrients
- Regulate body temperature
- Facilitate gas exchange
- Provide structural support

What is the primary function of the horse's cecum?

- Protein digestion
- Fermentative digestion
- Vitamin production
- Water absorption

What is the primary role of the horse's integumentary system?

- Digestion
- Respiration
- Circulation
- Protection

Which anatomical term refers to the highest point of the thoracic vertebrae?

- Flank
- Withers
- Pastern

Hock

What is the gestation period of a mare?

- 9 months
- 11 months
- 12 months
- 10 months
