- Fight infections
- Transport oxygen
- Clot blood
- Regulate body temperature

Which layer of the skin contains sweat glands?

- Epidermis
- Hypodermis
- Subcutaneous
- Dermis

Which of the following are functions of the skeletal system? (Select all that apply)

- Support
- Hormone production
- Blood cell production
- Mineral storage

Which gland is known as the 'master gland' of the endocrine system?

- Thyroid
- Pituitary
- Pancreas
- Adrenal

Which hormones are produced by the adrenal glands? (Select all that apply)

- Cortisol
- Insulin
- Adrenaline
- Thyroxine

Which structures are part of the central nervous system? (Select all that apply)

- Brain
- Spinal cord
- Peripheral nerves
- Sensory receptors

Which of the following are functions of the integumentary system? (Select all that apply)

- Protection
- Temperature regulation
- Sensation

- Blood filtration

Discuss the feedback mechanism involved in regulating blood glucose levels.

Which part of the brain is responsible for balance and coordination?

- Cerebrum
 Cerebellum
 Brainstem
 Hypothalamus

Which bone is the longest in the human body?

- Humerus
 Femur
 Radius
 Fibula

Explain the process of gas exchange in the alveoli.

Which organs are part of the respiratory system? (Select all that apply)

- Lungs
 Liver
 Trachea

Kidneys

What type of muscle is responsible for voluntary movements?

- Cardiac
- Skeletal
- None of the above
- Smooth
