Describe the stages of fetal development from conception to birth.

What is the primary function of the placenta during pregnancy?

- Producing sperm
- Facilitating nutrient exchange
- Producing eggs
- Trigger ovulation

Where does implantation of the fertilized egg occur?

- Ovary
- Fallopian Tube
- Uterus
- Cervix

Which of the following are functions of the female reproductive system?

- Producing eggs
- Nourishing a developing fetus
- Producing sperm
- Facilitating childbirth

Which phase of the menstrual cycle is characterized by the shedding of the uterine lining?

- Follicular Phase
- Ovulation
- Luteal Phase
- Menstrual Phase

Which genetic disorder is caused by an extra chromosome 21?

- Turner Syndrome
- Klinefelter Syndrome
- Down Syndrome
- Cystic Fibrosis

Which hormones are involved in the regulation of the menstrual cycle?

- Estrogen
- Testosterone
- Progesterone
- Luteinizing Hormone (LH)

Which structure in the female reproductive system releases the egg during ovulation?

- Uterus
- Ovary
- Fallopian Tube
- Cervix

What are the potential causes and treatments for infertility in both males and females?

Which of the following are common sexually transmitted infections (STIs)?

- Chlamydia
- Influenza
- Gonorrhea

Syphilis

Explain the process of spermatogenesis and its significance in male reproduction.

Explain the role of genetic inheritance in determining the traits of offspring.

What is the primary function of the testes in the male reproductive system?

- Producing sperm
- Storing sperm
- Producing seminal fluid
- Transportating sperm

Which hormone triggers ovulation in the female reproductive cycle?

- Estrogen
- Progesterone
- Luteinizing Hormone (LH)
- Follicle Stimulating Hormone (FSH)

Which of the following are functions of the placenta?

- Nutrient exchange
- Hormone production
- Oxygen supply

- Waste removal

Discuss the ethical considerations surrounding the use of assisted reproductive technologies.

Which of the following are parts of the male reproductive system?

- Testes
 Ovaries
 Vas deferens
 Prostate gland

Describe the hormonal changes that occur during the menstrual cycle and their effects on the female reproductive system.

What is the role of the prostate gland in the male reproductive system?

- Producing sperm
 Producing testosterone
 Producing seminal fluid
 Storing sperm

Which of the following are considered assisted reproductive technologies?

- In Vitro Fertilization (IVF)
 Surrogacy

- Natural conception
- Artificial Insemination
