Which of the following is an example of an invasive plant species in the United States?

- Oak tree
- Kudzu
- Pine tree
- Mapple tree

Which of the following is a common method used to control invasive species?

- Encouraging their spread
- Mechanical removal
- Ignoring them
- Providing them with food

What is the primary characteristic of an invasive species?

- Native to the area
- Causes harm to the environment, economy, or human health
- Beneficial to local ecosystems
- Rarely reproduces

Which sector is most directly affected by invasive species in terms of economic impact?

- Technology
- Agriculture
- Entertainment
- Education

How do invasive species contribute to the extinction of native species?

Why is international cooperation crucial in managing invasive species, and what challenges does it face?

Describe the economic impact of invasive species on agriculture.

Which impacts do invasive species have on human health? (Select all that apply)

- Disease transmission
- Improved air quality
- Allergies
- Increased physical fitness

What are some challenges in managing invasive species? (Select all that apply)

- High cost of eradication
- Lack of public interest
- Ineffective control methods

- Rapid spread

Which of the following are common invasive species? (Select all that apply)

- Cane toads
 Dandelions
 Zebra mussels
 Oak trees

Which of the following are impacts of invasive species on ecosystems? (Select all that apply)

- Increased biodiversity
 Disruption of food webs
 Habitat alteration
 Enhanced soil fertility

What is the primary goal of international cooperation regarding invasive species?

- To increase their population
 To promote their spread
 To prevent and manage them globally
 To ignore their impact

What are some characteristics that make a species invasive? (Select all that apply)

- Rapid reproduction
 High adaptability
 Strong natural predators
 Low adaptability

What are some prevention strategies for invasive species? (Select all that apply)

- Biosecurity measures
 Public awareness campaigns
 Encouraging their introduction
 Monitoring and reporting

What are some examples of successful eradication efforts of invasive species, and what made them successful?

What is the main reason invasive species are successful in new environments?

- They have natural predators
- They are less adaptable
- They reproduce slowly
- They often lack natural predators

What is a key feature of the zebra mussel that makes it invasive?

- It is a slow reproducer
- It cleans water bodies
- It has a high reproduction rate
- It is a native species

Which legislation is aimed at controlling invasive species in the United States?

- Clean Air Act
- Lacey Act
- Endangered Species Act
- Safe Drinking Water Act

Discuss the role of public education in preventing the spread of invasive species.

Explain how invasive species can alter local food webs.
