Which islands are considered part of the British Overseas Territories? (Select all that apply)
--

- A. Bermuda ✓
- C. Canary Islands
- D. Falklands ✓
- C. Cayman Islands ✓

Which of the following islands are known for volcanic activity? (Select all that apply)

- A. Iceland ✓
- C. Madagascar
- D. Japan ✓
- C. Hawaii ✓

Explain how volcanic islands are formed.

Volcanic islands are formed by volcanic activity, where magma from beneath the Earth's crust rises to the surface, cools, and solidifies, creating landmasses.

Discuss the cultural significance of islands in the Pacific Ocean.

Pacific islands have rich cultural traditions, including unique languages, dances, and crafts. They often have historical significance as sites of ancient civilizations and are central to the identity of indigenous peoples.

Describe the environmental challenges faced by island nations due to climate change.

Island nations face rising sea levels, increased storm frequency, and coral bleaching, threatening ecosystems, freshwater supplies, and infrastructure.

What are the economic impacts of tourism on island communities?

Tourism can boost local economies by creating jobs and generating revenue but can also lead to environmental degradation and cultural commodification if not managed sustainably.

Identify and explain the historical importance of any island of your choice.

Malta has historical importance due to its strategic location in the Mediterranean, serving as a key naval base during World War II and hosting ancient structures like the Megalithic Temples.

How do coral islands differ from volcanic islands in terms of formation and ecology?

Coral islands are formed from coral reef growth, often on submerged volcanic islands, and have ecosystems reliant on marine life. Volcanic islands are formed from volcanic eruptions and have more diverse terrestrial ecosystems.
