Which islands are considered part of the British Overseas Territories? (Select all that apply)

- Bermuda ✓
- Canary Islands
- Falklands ✓
- Cayman Islands ✓

The British Overseas Territories include several islands such as Bermuda, the Falklands, Gibraltar, and the British Virgin Islands, among others. These territories are self-governing but under the sovereignty of the United Kingdom.

Which of the following islands are known for volcanic activity? (Select all that apply)

- Iceland ✓
- Madagascar
- Japan ✓
- Hawaii ✓

Islands such as Hawaii, Iceland, and the Galapagos are well-known for their volcanic activity due to their locations along tectonic plate boundaries or hotspots.

Explain how volcanic islands are formed.

Volcanic islands are formed by volcanic activity, where magma from beneath the Earth's crust rises to the surface, cools, and solidifies, creating landmasses.

Discuss the cultural significance of islands in the Pacific Ocean.

Pacific islands have rich cultural traditions, including unique languages, dances, and crafts. They often have historical significance as sites of ancient civilizations and are central to the identity of indigenous peoples.

Describe the environmental challenges faced by island nations due to climate change.

Island nations face rising sea levels, increased storm frequency, and coral bleaching, threatening ecosystems, freshwater supplies, and infrastructure.

What are the economic impacts of tourism on island communities?

Tourism can boost local economies by creating jobs and generating revenue but can also lead to environmental degradation and cultural commodification if not managed sustainably.

Identify and explain the historical importance of any island of your choice.

Malta has historical importance due to its strategic location in the Mediterranean, serving as a key naval base during World War II and hosting ancient structures like the Megalithic Temples.

How do coral islands differ from volcanic islands in terms of formation and ecology?

Coral islands are formed from coral reef growth, often on submerged volcanic islands, and have ecosystems reliant on marine life. Volcanic islands are formed from volcanic eruptions and have more diverse terrestrial ecosystems.

Which island is known for its Moai statues?

- Fiji
- Iceland
- Galápagos Islands
- Easter Island ✓

Easter Island, also known as Rapa Nui, is famous for its large stone statues called Moai, which were created by the island's early inhabitants. These statues are a significant part of the island's cultural heritage and attract many visitors each year.

Which of the following is the largest island in the world?

- Borneo
- Greenland ✓**
- New Guinea
- Madagascar

Greenland is the largest island in the world, covering an area of about 2,166,086 square kilometers. It is located between the Arctic and Atlantic Oceans and is an autonomous territory within the Kingdom of Denmark.

Which country governs the Canary Islands?

- Portugal
- Spain ✓**
- Italy
- Morocco

The Canary Islands are an autonomous community of Spain, located off the northwest coast of Africa. They are known for their beautiful landscapes, beaches, and mild climate.

Which island is known for its unique species of lemurs?

- Madagascar ✓**
- Borneo
- Sri Lanka
- Galápagos Islands

Madagascar is renowned for its diverse and unique species of lemurs, which are found nowhere else in the world. This island's isolation has led to the evolution of these distinct primates, making it a significant location for biodiversity.

Which island group is located in the Pacific Ocean?

- Caribbean
- Galápagos Islands ✓**
- Mediterranean
- Seychelles

The Pacific Ocean is home to several island groups, including the Hawaiian Islands, the Solomon Islands, and the Marquesas Islands. These islands are known for their unique cultures, biodiversity, and geographical features.
