What is the first step in the LOTO procedure?

- A. Verification
- B. Shutdown
- C. Preparation ✓**
- D. Isolation

Reflect on a scenario where LOTO procedures might be challenging to implement and suggest possible solutions.

In a manufacturing facility where multiple machines are being serviced at the same time, LOTO procedures may be difficult to implement due to the risk of miscommunication and overlapping work. To address this, a centralized communication system can be established to ensure all workers are aware of LOTO status, and regular training sessions can be conducted to reinforce the importance of following LOTO protocols.
