**Which artery primarily supplies blood to the facial muscles?**

- Carotid artery
- Facial artery
- Lingual artery
- Occipital artery

**Which muscle is involved in the lateral flexation of the neck?**

- Sternocleidomastoideus
- Trapezius
- Temporalis
- Buccinator

**Which of the following muscles contribute to neck flexation? (Select all that apply)**

- Sternocleidomastoideus
- Trapezius
- Longus colli
- Scalenes

**Which muscles are involved in facial expressions? (Select all that apply)**

- Orbicularis oris
- Zygomaticus minor
- Temporalis
- Platysma

**Describe the role of the sternocleidomastoideus muscle in head movement.**

**Which muscles are part of the suprahyoid group? (Select all that apply)**

- Mylohyoid
- Geniohyoid
- Sternohyoid
- Digastric

**Which muscle assists in elevating the hyoid bone during swallowing?**

- Sternohyoid
- Mylohyoid
- Platysma
- Omohyoid

**Which muscle is known for its role in smiling?**

- Buccinator
- Zygomaticus major
- Masseter
- Platysma

**Discuss the impact of Bell's palsy on the muscles of the head and neck.**

**Explain how the trapezius muscle contributes to both head and shoulder movements.**

**Outline the blood supply to the neck muscles and its importance.**

**Which muscles are innervated by the trigeminal nerve? (Select all that apply)**

- Masseter
- Temporalis
- Orbicularis oculi
- Lateral pterygoid

**Identify the muscles involved in swallowing and describe their functions.**

**What is the origin of the temporalis muscle?**

- Zygomatic arch
- Temporal fossa
- Mandibular angle
- Occipital bone

**What is the main function of the masseter muscle?**

- Elevates the eyebrows
- Closes the jaw
- Rotates the head
- Depresses the mandible

**Which of the following muscles are involved in mastication? (Select all that apply)**

- Masseter
- Temporalis
- Buccinator
- Medial pterygoid

**Which muscle is primarily responsible for closing the eyelids?**

- Orbicularis oris
- Orbicularis oculi
- Masseter
- Temporalis

**Which muscles assist in the elevation of the mandible? (Select all that apply)**

- Masseter
- Temporalis
- Lateral pterygoid
- Medial pterygoid

**Which nerve innervates the muscles of facial expression?**

- Trigeminal nerve
- Facial nerve
- Glossopharyngeal nerve
- Vagus nerve

**Explain the clinical significance of the facial nerve in facial muscle function.**
