**Which of the following is a type of renewable energy?**

- Coal
- Natural Gas
- Solar Energy
- Nuclear Energy

**What is the primary source of energy for wind turbines?**

- Water
- Sunlight
- Wind
- Geothermal heat

**Discuss the economic impacts of transitioning to renewable energy on a national scale.**

**Describe the role of government incentives in promoting renewable energy adoption.**

**What are the environmental benefits of using wind energy compared to fossil fuels?**

**How does geothermal energy extraction impact the environment, and what measures can mitigate these effects?**

**Predict the future trends in renewable energy technology and their potential impact on global energy consumption.**

**What is the main component of a photovoltaic cell?**

- Copper
- Silicon
- Aluminum
- Iron

**What is a common environmental concern associated with hydroelectric power?**

- Air pollution
- Water pollution
- Impact on fish migration
- Deforestation

**Which renewable energy source utilizes the Earth's internal heat?**

- Biomass
- Wind
- Geothermal
- Hydroelectric

**Which of the following is NOT a benefit of renewable energy?**

- Reduces greenhouse gas emissions
- Unlimited supply
- High carbon footprint
- Sustainable

**Which of the following are considered renewable energy sources? (Select all that apply)**

- Solar
- Wind
- Coal
- Biomass

**What is the main disadvantage of solar energy?**

- High operational costs
- Intermittency
- Pollution
- High carbon emissions

**What are some challenges of integrating renewable energy into the grid? (Select all that apply)**

- Intermittency
- High carbon emissions
- Storage limitations
- Grid infrastructure upgrades

**Explain how solar panels convert sunlight into electricity.**

**Which countries are leading in wind energy production? (Select all that apply)**

- Denmark
- Saudi Arabia
- United States
- Brazil

**Which country is currently the largest producer of solar energy?**

- Germany
- China
- United States
- India

**What are some advantages of using renewable energy? (Select all that apply)**

- Reduces reliance on fossil fuels
- Consistent energy supply
- Creates jobs in green technologies
- High initial setup costs

**Which renewable energy sources are affected by weather conditions? (Select all that apply)**

- Solar
- Wind
- Geothermal
- Biomass

**Which technologies are used to store renewable energy? (Select all that apply)**

- Batteries
- Flywheels
- Fossil fuel reserves
- Pumped hydro storage
