Which processes are found on the scapula? (Select all that apply)

- Acromium
- Coracoid
- Olecronon
- Styloid

Which ligaments are associated with the scapula? (Select all that apply)

- Coracoacrominal ligament
- Patellar ligament
- Acromioclavicular ligament
- Criciate ligament

What are the main movements facilitated by the scapula? (Select all that apply)

- Flexión
- Elevation
- Retraction
- Supination

Which muscle is NOT attached to the scapula?

- Deltoid
- Supraspinatus
- Trapezius
- Biceps brachii

Which angle of the scapula is closest to the vertebral column?

- Superior angle
- Inferior angle

- Lateral angle
- Medial angle

Which of the following muscles attach to the scapula? (Select all that apply)

- Trapezius
- Pectoralis major
- Teres minor
- Latissimus dorsi

Which joint involves the articulation of the scapula and clavicle?

- Glenohumeral joint
- Sternoclavicular joint
- Scapulothoracic joint
- Acromioclavicular joint

Which of the following are common injuries associated with the scapula? (Select all that apply)

- Fractures
- Dislocations
- Tendonitis
- Wing scapula

Which of the following is NOT a border of the scapula?

- Superior
- Inferior
- Lateral
- Medial

Which process of the scapula is most superior?

- Coracoid process
- Spine of the scapula
- Glenoid process
- Acromion process

What is the primary function of the glenoid cavity?

- Muscle attachment
- Ligament support
- Protection of the ribcage
- Articulation with the humerus

What is the name of the fossa located above the spine of the scapula?

- Infraspinous fossa
- Supraspinous fossa
- Glenoid fossa
- Subscapular fossa

Which fossae are present on the scapula? (Select all that apply)

- Infraspinous fossa
- Supraspinous fossa
- Subscapular fossa
- Radical fossa

What type of bone is the scapula classified as?

- Long bone
- Flat bone
- Irregular bone
- Short bone
