What is the average annual temperature range in tropical rainforests?

- 10-15°C
- 15-20°C
- 20-25°C
- 25-30°C

How do the different layers of a tropical rainforest contribute to its overall ecosystem function?

What strategies can be implemented to promote sustainable management of tropical rainforests?

What are some of the ecological roles of tropical rainforests? (Select all that apply)

- Regulating local climates
- Producing oxygen
- Providing habitat for diverse species

- Reducin soil erosion

What is the primary reason for the nutrient-poor soil in tropical rainforests?

- Heavy rainfall washes away nutrients
 Lack of vegetation
 Low biodiversity
 High altitude

Which of the following is a major threat to tropical rainforests?

- Overfishing
 Deforestation
 Desertification
 Volcanic eruptions

What role do tropical rainforests play in the global carbon cycle?

- They are major carbon emitters
 They are significant carbon sinks
 They have no impact on carbon levels
 They increase atmospheric CO₂

Which of the following animals is commonly found in tropical rainforests?

- Polar bear
 Kangaroo
 Jaguar
 Penguin

Which human activities contribute to deforestation in tropical rainforests? (Select all that apply)

- Logging
 Agriculture
 Urban expansion
 Fishing

What is a common characteristic of trees in tropical rainforests?

- Needles-like leaves

- Broadleaf evergreen foliage
- Deciduous leaves
- Coniferous cones

Which of the following are benefits of conserving tropical rainforests? (Select all that apply)

- Preservation of biodiversity
- Stabilization of global climate
- Increased desertification
- Protection of indigenous cultures

What factors contribute to the high biodiversity of tropical rainforests? (Select all that apply)

- Stable climate
- High nutrient soil
- Complex ecosystem structure
- Long evolutionary history

Describe the relationship between indigenous communities and tropical rainforests.

Discuss the impact of deforestation on the carbon cycle.

Explain how tropical rainforests influence global weather patterns.

Why is it important to preserve the biodiversity found in tropical rainforests?

Which continent hosts the largest tropical rainforest in the world?

- Africa
- Asia
- South America
- Australia

Which layer of the tropical rainforest receives the most sunlight?

- Emergent layer
- Canopy
- Undergrowth
- Forest floor

Which of the following regions have significant tropical rainforest coverage? (Select all that apply)

- Amazon Basin
- Sahara Desert
- Congo Basin
- Southeast Asia

What are some common animals found in the tropical rainforest canopy? (Select all that apply)

- Sloths
- Eagles
- Frogs
- Snakes
