Explain the impact of mountain ranges on climate and weather patterns in their regions.

Mountain ranges affect climate and weather patterns by blocking moisture-laden winds, causing increased precipitation on the windward slopes and creating arid conditions on the leeward side.

Which country is known as the 'Land of the Rising Sun'?

- China
- Japan ✓**
- South Korea
- Thailand

Japan is commonly referred to as the 'Land of the Rising Sun' due to its name in Japanese, 'Nihon' or 'Nippon', which translates to 'origin of the sun'. This nickname reflects Japan's geographical position to the east of the Asian continent, where the sun rises.
