Part 1: Building a Foundation

What is the result of $5 - 2$?

Hint: Think about how many you have left after taking away 2 from 5.

- A) 4
- B) 3 ✓
- C) 2
- D) 1

■ The correct answer is 3, as 5 minus 2 equals 3.

Which of the following are subtraction sentences? (Select all that apply)

Hint: Look for sentences that involve taking away.

- A) $7 - 3 = 4$ ✓
- B) $5 + 2 = 7$
- C) $9 - 4 = 5$ ✓
- D) $8 + 1 = 9$

■ The correct answers are A) $7 - 3 = 4$ and C) $9 - 4 = 5$.

Explain what the subtraction symbol (-) means in a number sentence.

Hint: Think about what happens when you see this symbol.

The subtraction symbol (-) indicates that you are taking away a number from another number.

Identify the parts of the subtraction sentence $10 - 6 = 4$. Provide the terms for each part.

Hint: Think about what each number represents.

1. Minuend:

10

2. Subtrahend:

6

3. Difference:

4

The minuend is 10, the subtrahend is 6, and the difference is 4.

Part 2: comprehension and Application

If you have 8 apples and give away 3, how many apples do you have left?

Hint: Subtract the number of apples given away from the total.

- A) 6
 B) 5 ✓
 C) 4
 D) 3

■ The correct answer is 5, as 8 minus 3 equals 5.

Which scenarios describe subtraction? (Select all that apply)

Hint: Think about situations where something is taken away.

- A) Adding more candies to a jar.
 B) Taking some books off a shelf. ✓
 C) Sharing cookies equally.
 D) Removing toys from a box. ✓

■ The correct answers are B) Taking some books off a shelf and D) Removing toys from a box.

Describe a real-life situation where you would use subtraction to solve a problem.

Hint: Think about a time when you had to take something away.

■ A real-life situation could be when you have a certain number of candies and you eat some.

You have 15 marbles and lose 7. How many marbles do you have now?

Hint: Subtract the number of lost marbles from the total.

- A) 9
 B) 8 ✓
 C) 7
 D) 6

The correct answer is 8, as 15 minus 7 equals 8.

Which of the following subtraction problems can be solved using a number line? (Select all that apply)

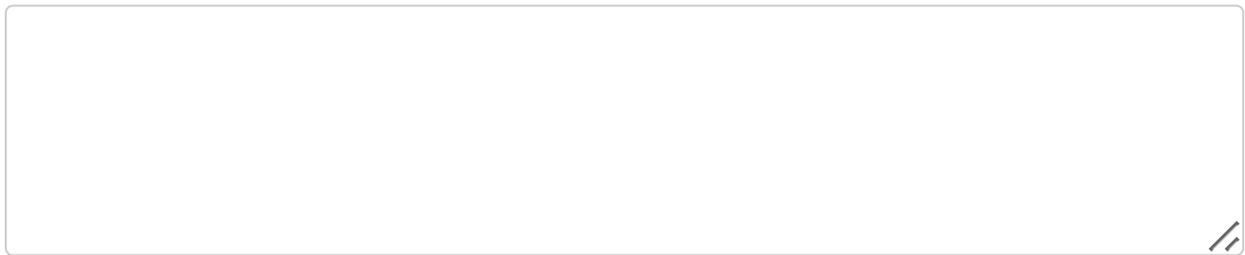

Hint: Think about problems that involve moving backwards on a number line.

- A) $12 - 5$ ✓
- B) $20 - 10$ ✓
- C) $7 + 3$
- D) $15 - 9$

The correct answers are A) $12 - 5$ and B) $20 - 10$.

Use a ten frame to show how you would solve the subtraction problem $10 - 4$.

Hint: Draw a ten frame and show the subtraction visually.

A ten frame can show 10 filled in and then 4 taken away, leaving 6.

Part 3: Analysis, Evaluation, and Creation

Which number sentence shows the inverse relationship of $8 - 3 = 5$?

Hint: Think about how addition can relate to subtraction.

- A) $5 + 3 = 8$ ✓
- B) $8 + 3 = 11$
- C) $3 + 5 = 8$
- D) $5 - 3 = 2$

The correct answer is A) $5 + 3 = 8$, as it shows the inverse operation.

Which of the following statements are true about subtraction? (Select all that apply)

Hint: Consider the properties and relationships of subtraction.

- A) Subtraction is the opposite of addition. ✓**
- B) Subtraction can be checked using addition. ✓**
- C) Subtraction always results in a larger number.
- D) Subtraction is used to find the difference between numbers. ✓**

The correct answers are A) Subtraction is the opposite of addition, B) Subtraction can be checked using addition, and D) Subtraction is used to find the difference between numbers.

Explain how you can use addition to check the answer to a subtraction problem.

Hint: Think about how the two operations relate to each other.

You can add the difference to the subtrahend to see if it equals the minuend.

Which subtraction problem would you solve first if you wanted to find the largest difference?

Hint: Consider which numbers will give you the biggest result when subtracted.

- A) 15 - 7
- B) 20 - 5 ✓**
- C) 10 - 3
- D) 18 - 9

The correct answer is B) 20 - 5, as it gives the largest difference of 15.

Which of the following subtraction problems require regrouping? (Select all that apply)

Hint: Think about problems where you need to borrow.

- A) 13 - 5
- B) 21 - 14 ✓**

- C) 30 - 12
- D) 25 - 19 ✓

■ The correct answers are B) 21 - 14 and D) 25 - 19.

Create your own subtraction word problem and solve it. Describe the steps you took to find the solution.

Hint: Think of a scenario where you need to take away something.

■ You can create a problem like 'I have 10 cookies and eat 3,' and the steps involve subtract 3 from 10.
