Hint: Think about simple addition.

- A) 3
- A) 4
- A) 5 ✓
- A) 6

You would have a total of five apples.

If you have three apples and you get two more, how many apples do you have in total?

Hint: Think about adding numbers together.

- A) 3
- B) 4
- C) 5 ✓
- D) 6

The correct answer is C) 5, as $3 + 2$ equals 5.

If you have three apples and you get two more, how many apples do you have in total?

Hint: Think about simple addition.

- A) 3
- A) 4

- A) 5 ✓
 A) 6

■ You would have a total of five apples.

Which of the following activities can help a child learn to count? (Select all that apply)

Hint: Think about engaging activities.

- A) Singing counting songs ✓
 A) Watching TV
 A) Counting blocks ✓
 A) Reading a book about numbers ✓

■ Activities like singing counting songs and counting blocks can help children learn to count.

Which of the following activities can help a child learn to count? (Select all that apply)

Hint: Think about fun ways to practice counting.

- A) Singing counting songs ✓
 B) Watching TV
 C) Counting blocks ✓
 D) Reading a book about numbers ✓

■ The correct answers are A) Singing counting songs, C) Counting blocks, D) Reading a book about numbers.

Which of the following activities can help a child learn to count? (Select all that apply)

Hint: Think about engaging activities.

- A) Singing counting songs ✓
 A) Watching TV
 A) Counting blocks ✓
 A) Reading a book about numbers ✓

■ Activities like singing counting songs and counting blocks can help children learn to count.

Describe a simple game you could play with a child to help them learn the numbers 1 to 5.

Hint: Think about interactive games.

| A simple game could be counting objects while playing.

Describe a simple game you could play with a child to help them learn the numbers 1 to 5.

Hint: Think about games that involve counting.

| Answers may vary, but examples include counting games with toys or using fingers.

Describe a simple game you could play with a child to help them learn the numbers 1 to 5.

Hint: Think about interactive games.

| A simple game could be counting objects while playing.

Why might a worksheet use animals to teach counting?

Hint: Think about what children like.

A) Animals are difficult to draw

- B) Animals are familiar and engaging for children ✓
- C) Animals are not related to numbers
- D) Animals are only for older children

■ The correct answer is B) Animals are familiar and engaging for children.

Why might a worksheet use animals to teach counting?

Hint: Consider children's interests.

- A) Animals are difficult to draw
- A) Animals are familiar and engaging for children ✓
- A) Animals are not related to numbers
- A) Animals are only for older children

■ Animals are familiar and engaging for children.

Why might a worksheet use animals to teach counting?

Hint: Consider children's interests.

- A) Animals are difficult to draw
- A) Animals are familiar and engaging for children ✓
- A) Animals are not related to numbers
- A) Animals are only for older children

■ Animals are familiar and engaging for children.

How do worksheets support cognitive development in young children? (Select all that apply)

Hint: Think about the benefits of doing worksheets.

- A) By providing repetitive tasks ✓
- B) By encouraging problem-solving ✓
- C) By offering creative activities ✓
- D) By limiting social interaction

■ The correct answers are A) By providing repetitive tasks, B) By encouraging problem-solving, C) By offering creative activities.

How do worksheets support cognitive development in young children? (Select all that apply)

Hint: Think about learning strategies.

- A) By providing repetitive tasks ✓**
- A) By encouraging problem-solving ✓**
- A) By offering creative activities ✓**
- A) By limiting social interaction

Worksheets support cognitive development by providing repetitive tasks and encouraging problem-solving.

How do worksheets support cognitive development in young children? (Select all that apply)
