Part 1: Building a Foundation

Which of the following is a mammal?

undefined. A) Crocodile

undefined. B) Eagle

undefined. C) Dolphin ✓

undefined. D) Shark

The correct answer is C) Dolphin, as it is a mammal.

Which of the following animals are typically found in a desert habitat? (Select all that apply)

undefined. A) Camel ✓

undefined. B) Penguin

undefined. C) Scorpion ✓

undefined. D) Polar Bear

The correct answers are A) Camel and C) Scorpion.

List three characteristics that are common to all birds.

Common characteristics include feathers, beaks, and the ability to lay eggs.

Provide the Spanish translation for the following animals: Dog, Cat, Elephant.

1. Dog

Perro

2. Cat

Gato

3. Elephant

Elefante

The translations are: Dog - Perro, Cat - Gato, Elephant - Elefante.

Part 2: Understanding and Interpretation

What is the primary reason some animals migrate?

undefined. A) To find new habitats

undefined. B) To escape predators

undefined. C) To find food and better climate ✓

undefined. D) To reproduce

The correct answer is C) To find food and better climate.

Which of the following are characteristics of reptiles? (Select all that apply)

undefined. A) Warm-bloodied

undefined. B) Lay eggs ✓

undefined. C) Have scales ✓

undefined. D) Live in water

The correct answers are B) Lay eggs and C) Have scales.

Explain why amphibians are unique in their ability to live both in water and on land.

Amphibians have a life cycle that includes both aquatic and terrestrial stages, and they possess adaptations like permeable skin.

Part 3: Application and Analysis

If a polar bear is moved to a tropical rainforest, what is the most likely outcome?

undefined. A) It will thrive due to abundant food

undefined. B) It will struggle due to the heat ✓

undefined. C) It will adapt quickly
undefined. D) It will become nocturnal

The correct answer is B) It will struggle due to the heat.

How can conservation efforts help endangered species? (Select all that apply)

undefined. **A) Protect natural habitats ✓**

undefined. **B) Banning hunting ✓**

undefined. C) Increasing urban development

undefined. **D) Establish breeding programs ✓**

The correct answers are A) Protect natural habitats, B) Banning hunting, and D) Establish breeding programs.

Describe how a fish's gills function to allow it to breathe underwater.

Fish gills extract oxygen from water as it flows over them, allowing for respiration underwater.

Which of the following relationships is an example of mutualism?

undefined. A) Lion and zebra

undefined. **B) Bee and flower ✓**

undefined. C) Cat and mouse

undefined. D) Shark and fish

The correct answer is B) Bee and flower, as both benefit from the interaction.

Analyze the following scenarios and identify which involve animals adapting to their environment. (Select all that apply)

undefined. **A) A bear hibernating in winter ✓**

undefined. **B) A chameleon changing color ✓**

undefined. **C) A bird flying south for the winter ✓**

undefined. D) A fish swimming upstream

The correct answers are A) A bear hibernating in winter, B) A chameleon changing color, and C) A bird flying south for the winter.

Compare and contrast the habitats of a rainforest and a desert, focusing on how animals have adapted to each environment.

Rainforests are humid and rich in biodiversity, while deserts are dry and have specialized animals adapted to conserve water.

Part 4: Evaluation and Creation

Which conservation strategy is most effective for protecting marine life?

undefined. A) Building more aquariums

undefined. B) Establish marine protected areas ✓

undefined. C) Increasing fishing quotas

undefined. D) Introducing non-native species

The correct answer is B) Establish marine protected areas.

Evaluate the following statements and identify which are true about the impact of deforestation on animal habitats. (Select all that apply)

undefined. A) It leads to loss of biodiversity ✓

undefined. B) It creates more space for urban development

undefined. C) It disrupts food chains ✓

undefined. D) It increases animal populations

The correct answers are A) It leads to loss of biodiversity and C) It disrupts food chains.

Design a conservation plan for an endangered species of your choice. Include strategies for habitat protection, breeding programs, and community involvement.

A comprehensive conservation plan should address habitat protection, breeding programs, and ways to engage the community.
