What is the primary purpose of a BCBA?

The primary purpose of a BCBA (Board Certified Behavior Analyst) is to improve the quality of life for individuals by applying the principles of behavior analysis.

What does the acronym ABA stand for?

ABA stands for Applied Behavior Analysis.

What is a functional analysis in behavior analysis?

A functional analysis is a systematic method of identifying the function of a behavior by manipulating environmental variables.

What are the four functions of behavior?

The four functions of behavior are attention, escape, access to tangibles, and sensory stimulation.

What is reinforcement in the context of behavior analysis?

Reinforcement is a consequence that increases the likelihood of a behavior being repeated.

What is the difference between positive and negative reinforcement?

Positive reinforcement involves adding a stimulus to increase a behavior, while negative reinforcement involves removing a stimulus to increase a behavior.

What is a behavior intervention plan (BIP)?

A behavior intervention plan (BIP) is a plan that outlines strategies to address challenging behaviors and promote positive behaviors.

What is the role of data collection in ABA?

Data collection is essential in ABA as it provides objective evidence to assess the effectiveness of interventions and make data-driven decisions.

What is the difference between continuous and intermittent reinforcement schedules?

Continuous reinforcement provides reinforcement after every occurrence of a behavior, while intermittent reinforcement provides reinforcement after some occurrences.

What is shaping in behavior analysis?

Shaping is the process of reinforcing successive approximations of a desired behavior until the target behavior is achieved.
