What is dyslexia?

Dyslexia is a specific learning disability that is neurobiological in origin. It is characterized by difficulties with accurate and/or fluent word recognition and by poor spelling and decoding abilities.

What are common signs of dyslexia?

Common signs of dyslexia include difficulty reading, slow reading speed, problems with spelling, and challenges with writing.

How is dyslexia diagnosed?

Dyslexia is diagnosed through a comprehensive evaluation that includes a review of the individual's history, assessments of reading and language skills, and other cognitive tests.

What are some strategies to help students with dyslexia?

Strategies to help students with dyslexia include using multi-sensory teaching methods, providing extra time for reading and writing tasks, and using assistive technology.

Can dyslexia be cured?

Dyslexia cannot be cured, but with appropriate interventions and support, individuals can learn to manage their difficulties and improve their reading skills.
