What is a functional group?

A functional group is a specific group of atoms within a molecule that is responsible for a characteristic of that molecule.

What is the functional group of alcohols?

The functional group of alcohols is the hydroxyl group (-OH).

What is the functional group of carboxylic acids?

The functional group of carboxylic acids is the carboxyl group (-COOH).

What is the functional group of amines?

The functional group of amines is the amino group (-NH<sub>2</sub>).

What is the functional group of aldehydes?

The functional group of aldehydes is the carbonyl group (C=O) at the end of a carbon chain.

What is the functional group of ketones?

The functional group of ketones is the carbonyl group (C=O) within a carbon chain.

What is the functional group of esters?

The functional group of esters is the ester group (-COO-).

What is the functional group of ethers?

The functional group of ethers is the ether group (-O-).

What is the functional group of amides?

The functional group of amides is the amide group (-CONH<sub>2</sub>).

What is the functional group of nitriles?

The functional group of nitriles is the cyano group (-CN).
