Part 1: Building a Foundation

What symbol is used to represent subtraction?

Hint: Think about the basic arithmetic symbols.

- +
-
- ×
- ÷

Which of the following words are associated with subtraction? (Select all that apply)

Hint: Think about words that indicate taking away.

- Add
- Minus
- Take away
- Multiply

Explain what subtraction means in your own words.

Hint: Think about how you would describe it to a friend.

List two objects you can use to visually demonstrate subtraction.

Hint: Think of items that can be counted.

1. Object 1

2. Object 2

Part 2: Understanding and Interpretation

If you have 5 apples and give away 2, how many apples do you have left?

Hint: Subtract the number of apples given away from the total.

- 2
- 3
- 4
- 5

Which of the following are examples of subtraction problems? (Select all that apply)

Hint: Look for problems that involve taking away.

- $7 - 2$
- $5 + 3$
- $9 - 4$
- 6×2

Describe a real-life situation where you might need to use subtraction.

Hint: Think about everyday activities.

Part 3: Application and Analysis

You have 10 candies, and you eat 4. How many candies do you have left?

Hint: Subtract the number of candies eaten from the total.

- 5
- 6
- 7
- 8

Which scenarios involve subtraction? (Select all that apply)

Hint: Look for situations where something is taken away.

- Counting the number of toys left after giving some away.
- Adding more blocks to a tower.
- Calculating the remaining money after a purchase.
- Multiplying the number of books on a shelf.

Create a simple subtraction story problem and solve it.

Hint: Think of a scenario that involves taking away.

Part 4: Evaluation and Creation

What is the difference between 15 and 7?

Hint: Subtract the smaller number from the larger number.

- 6
- 7
- 8

9

Identify the errors in the following subtraction problems: $10 - 3 = 8$, $12 - 5 = 7$, $9 - 4 = 5$. (Select all that apply)

Hint: Check each subtraction problem for accuracy.

- $10 - 3 = 8$
- $12 - 5 = 7$
- $9 - 4 = 5$
- None of the above

Analyze the following problem and explain why the answer is incorrect: $8 - 3 = 6$.

Hint: Think about how subtraction works.

Which subtraction strategy is most efficient for solving $20 - 9$?

Hint: Consider the methods you know for subtraction.

- Counting up from 9 to 20
- Counting down from 20 to 9
- Using a number line
- GuessING

Evaluate the following subtraction strategies and select those that are effective. (Select all that apply)

Hint: Think about strategies that help you solve subtraction problems.

- Using fingers to count
- Drawing pictures
- Memorizing subtraction facts
- Ignoring the problem

Design a subtraction game that helps others learn subtraction in a fun way. Describe the rules and how it works.

Hint: Think about games you enjoy that involve math.
