Part 1: Building a Foundation

What is the base unit of length in the metric system?

Hint: Think about the fundamental unit used for measuring length.

⚪ A) Inch
⚪ **B) Meter** ✓
⚪ C) Foot
⚪ D) Yard

❚ The base unit of length in the metric system is the meter.

What is the base unit of length in the metric system?

Hint: Think about the fundamental units in the metric system.

⚪ A) Inch
⚪ **B) Meter** ✓
⚪ C) Foot
⚪ D) Yard

❚ The base unit of length in the metric system is the meter.

Which of the following are units of mass in the metric system? (Select all that apply)

Hint: Consider the common units used to measure weight.

☐ **A) Gram** ✓
☐ B) Pound
☐ **C) Kilogram** ✓
☐ D) Ounce

Create hundreds of practice and test experiences based on the latest learning science.

The units of mass in the metric system include grams and kilograms.

Which of the following are units of mass in the metric system? (Select all that apply)

Hint: Consider the common units used to measure mass.

☐ **A) Gram ✓**
☐ B) Pound
☐ **C) Kilogram ✓**
☐ D) Ounce

The units of mass in the metric system include grams and kilograms.

Explain the relationship between milliliters and liters in the metric system.

Hint: Consider how these two units are related in terms of volume.

1 liter is equal to 1,000 milliliters.

Explain the relationship between milliliters and liters in the metric system.

Hint: Consider how many milliliters are in a liter.

There are 1,000 milliliters in a liter.

List the conversion factors for the following:

Create hundreds of practice and test experiences based on the latest learning science.

Metric Conversion Worksheet Questions and Answers PDF

🔥 **StudyBlaze.io**

Your AI Tutor for interactive quiz, worksheet and flashcard creation.

Hint: Think about the standard conversions in the metric system.

1. 1 meter = ___ centimeters

> 100

2. 1 kilogram = ___ grams

> 1000

3. 1 liter = ___ milliliters

> 1000

1 meter = 100 centimeters, 1 kilogram = 1000 grams, 1 liter = 1000 milliliters.

Which of the following correctly describes the relationship between kilometers and meters?

Hint: Consider how many meters are in a kilometer.

○ A) 1 kilometer = 100 meters
○ **B) 1 kilometer = 1,000 meters ✓**
○ C) 1 kilometer = 10,000 meters
○ D) 1 kilometer = 100,000 meters

1 kilometer is equal to 1,000 meters.

Which of the following correctly describes the relationship between kilometers and meters?

Hint: Think about the metric prefixes.

○ A) 1 kilometer = 100 meters
○ **B) 1 kilometer = 1,000 meters ✓**
○ C) 1 kilometer = 10,000 meters
○ D) 1 kilometer = 100,000 meters

Create hundreds of practice and test experiences based on the latest learning science.

> 1 kilometer is equal to 1,000 meters.

Part 2: comprehension and Application

Which of the following statements about metric conversions is true? (Select all that apply)

Hint: Think about the principles of metric conversions.

☐ **A) Metric conversions are based on powers of 10.** ✓
☐ B) Converting between metric units requires complex calculations.
☐ C) 1 gram is larger than 1 kilogram.
☐ **D) 1 liter is equivalent to 1,000 milliliters.** ✓

> Metric conversions are based on powers of 10, and 1 liter is equivalent to 1,000 milliliters.

Which of the following statements about metric conversions is true? (Select all that apply)

Hint: Consider the principles of metric conversions.

☐ **A) Metric conversions are based on powers of 10.** ✓
☐ B) Converting between metric units requires complex calculations.
☐ C) 1 gram is larger than 1 kilogram.
☐ **D) 1 liter is equivalent to 1,000 milliliters.** ✓

> True statements include that metric conversions are based on powers of 10 and that 1 liter is equivalent to 1,000 milliliters.

Describe how you would convert 500 centimeters to meters using the metric conversion principles.

Hint: Think about the relationship between centimeters and meters.

> **To convert 500 centimeters to meters, divide by 100, resulting in 5 meters.**

Create hundreds of practice and test experiences based on the latest learning science.

Describe how you would convert 500 centimeters to meters using the metric conversion principles.

Hint: Think about the relationship between centimeters and meters.

> **To convert 500 centimeters to meters, divide by 100.**

If you have 2,500 milligrams, how many grams do you have?

Hint: Remember the conversion between milligrams and grams.

◯ **A) 2.5 grams** ✓
◯ B) 25 grams
◯ C) 250 grams
◯ D) 0.25 grams

> 2,500 milligrams is equal to 2.5 grams.

If you have 2,500 milligrams, how many grams do you have?

Hint: Remember the conversion between milligrams and grams.

◯ **A) 2.5 grams** ✓
◯ B) 25 grams
◯ C) 250 grams
◯ D) 0.25 grams

> 2,500 milligrams is equal to 2.5 grams.

You are baking a cake and the recipe calls for 2 liters of milk. You only have a measuring cup marked in milliliters. How many milliliters of milk do you need? (Select all that apply)

Hint: Consider the conversion between liters and milliliters.

☐ A) 200 mL
☐ **B) 2,000 mL** ✓

Create hundreds of practice and test experiences based on the latest learning science.

150 kilometers is equal to 150,000 meters.

You have a package weighing 1.5 kilograms. How many grams does the package weigh?

Hint: Remember the conversion between kilograms and grams.

○ A) 150 grams
○ **B) 1,500 grams** ✓
○ C) 15,000 grams
○ D) 150,000 grams

1.5 kilograms is equal to 1,500 grams.

You have a package weighing 1.5 kilograms. How many grams does the package weigh?

Hint: Convert kilograms to grams.

○ A) 150 grams
○ **B) 1,500 grams** ✓
○ C) 15,000 grams
○ D) 150,000 grams

1.5 kilograms is equal to 1,500 grams.

Part 3: Analysis, Evaluation, and Creation

Analyze the following scenario: You have a container that holds 3 liters of water. If you pour out 750 milliliters, how much water is left in liters? (Select all that apply)

Hint: Consider the conversion between milliliters and liters.

☐ **A) 2.25 liters** ✓
☐ B) 2.75 liters
☐ C) 3.25 liters
☐ D) 3.75 liters

After pouring out 750 milliliters, 2.25 liters of water is left.

Analyze the following scenario: You have a container that holds 3 liters of water. If you pour out 750 milliliters, how much water is left in liters? (Select all that apply)
