What is the primary characteristic that distinguishes waterfowl from other birds?

Waterfowl are characterized by their webbed feet, which make them excellent swimmers.

Name two common types of waterfowl.

Ducks and geese are two common types of waterfowl.

What is the typical habitat of waterfowl?

Waterfowl typically inhabit wetlands, lakes, rivers, and coastal areas.

What do waterfowl primarily eat?

Waterfowl primarily eat aquatic plants, seeds, and small invertebrates.

How do waterfowl contribute to their ecosystems?

Waterfowl contribute to their ecosystems by helping to control aquatic plant growth and serving as prey for other animals.
